

DHINAKARAN MS

☎ 7708846581 ✉ dhinakaranms123@gmail.com 📍 dhinakaran311 🌐 Dhinakaran 📁 Portfolio 📍 Tirupur, India

PROFESSIONAL SUMMARY

Software Engineer with a solid foundation in Computer Science and expertise in **Artificial Intelligence & Machine Learning**, skilled in developing scalable full-stack and AI-driven applications. Proficient in **Java, Python, JavaScript, React, FastAPI**, and **SQL**, with a strong focus on modern software development practices. Dedicated to designing efficient systems, tackling complex algorithmic challenges, and creating production-ready solutions within collaborative Agile environments.

EDUCATIONS

KIT-Kalaigarkarananidhi Institute of Technology | Coimbatore - Tamilnadu, India Jun 2023 - May 2027
BE CSE(AI&ML) CGPA : 7.69

- Coursework: DSA, Computer Architecture, Computer Networks, Operating Systems, Database Management Systems, OOPS

WORK EXPERIENCE

Full Stack Intern | Trainee Jun 2025 - Jun 2025
LearnLogicfy Technologies LLP On-site • Coimbatore - Tamilnadu, India

- Developed** responsive web projects using **HTML**, **CSS**, and **JavaScript**, focusing on **UI/UX design** and frontend optimization.
- Implemented** reusable UI components, ensuring **cross-browser compatibility** and **mobile responsiveness**.

Technologies / Skills Used : React, Tailwind CSS, MongoDB, HTML, JS, GIT, GITHUB

Machine Learning Internship | Trainee Dec 2024 - Jan 2025
Appin Technology, Coimbatore On-site • Coimbatore - Tamilnadu, India

- Developed a predictive machine learning model to estimate food delivery times and optimize logistics.
- Engineered features like trip distance and traffic density from raw data to enhance model accuracy.
- Trained and evaluated regression models using **Python** and **Scikit-learn**.
- Processed datasets and visualized delivery delay trends using **Pandas**, **NumPy**, and **Matplotlib**.

Technologies / Skills Used : Machine Learning, Python, scikit-learn, Data Preprocessing, Feature Engineering, Predictive Modeling.

PROJECTS

Code Vulnerability Scanner AI | 🌐 Code Vulnerability Scanner AI

Developed an **AI-powered code vulnerability scanner** using a 5-agent pipeline (Detect, Analyze, Explain, Fix, Validate) to automate secure code auditing.

- Built a scalable backend with **FastAPI** and integrated **LLM (Llama 3 via Groq API)** for real-time vulnerability detection and reasoning.
- Designed a modern **React + Vite frontend** with real-time scan progress, interactive dashboards, and detailed security insights.
- Implemented secure code execution and validation workflows, improving detection accuracy and reducing false positives.
- Collaborated in an Agile environment to enhance project efficiency.

Technologies / Tools Used : Python, FastAPI, React, Groq API, Docker

Legal Research Assistant | 🌐 Legal Research Assistant

- Developed** an **AI-powered legal research platform** using **Agentic RAG architecture** to facilitate **multi-step reasoning over Indian legal documents**.
- Designed** a **multi-agent system** (Planner, Retrieval, Conflict Checker, Synthesis) to dynamically process queries, enhancing answer accuracy.
- Built** a **hybrid retrieval pipeline** that integrates **ChromaDB** for vector search and **Neo4j** for knowledge graph, enabling context-aware legal information retrieval.
- Implemented** a scalable **microservices architecture** featuring a **Next.js** frontend, **Node.js** (GraphQL) backend, and **FastAPI** AI engine, integrated with **LLMs** for citation-based responses.

Technologies / Tools Used : Python, FastAPI, Neo4j, ChromaDB, Next.js, LLMs

Job Search Recommender System | 🌐 Job Search Recommender System

- Developed an **AI-powered job recommendation system** that parses resumes, extracts candidate skills, and matches profiles with relevant job opportunities.
- Built a **multi-factor recommendation engine** to rank jobs and classify opportunities into Safe, Stretch, and Fallback categories.
- Integrated the Adzuna REST API for real-time job listings and implemented LLM-assisted skill extraction, job summaries, skill-gap analysis, and personalized upskilling plans through a Streamlit interface.

Technologies / Tools Used : Python, Streamlit, Scikit-learn, REST APIs

SKILLS

Programming Languages :	Python, Java, JavaScript
Databases :	SQL, MongoDB, Firebase
Frameworks & Libraries :	React.js, FastAPI, Scikit-learn, Streamlit, Node.js
AI Technology :	RAG, Langchain, LLMs, Agentic RAG, ChromaDb, vector Search
CS Fundamentals :	DSA, OOPS, DBMS, OS
Tools & Platforms :	Git, GitHub, Docker, Render, CI/CD

CERTIFICATIONS

- AWS** - AI Practitioner
- NPTEL** - Cloud Computing
- NPTEL** - The Joy of Computing using Python (Elite)
- Coursera** - Machine Learning Basics
- Google** - Get Started with Python

COMPETITIVE PROGRAMMING

- LeetCode**: dhinakaran311 | Max rating: 2316 | Solved problems: 500+ | Badges: 10 | Highest rank: 158.
- CodeChef**: Kit23bam016 | Max rating: 2152 | Position: 4 Star | Solved problems: 900+ | Global rank: 701.
- Codeforces**: kit23bam016 | Position: Expert | Solved problems: 150+.

AWARDS & ACHIEVEMENTS

- MSME Idea Hackathon 5.0 (2025)**: Shortlisted in the **Top 40** out of **900+** national submissions.
- KPTIET Coding Contest (2024)**: Achieved **2nd Place** in the institute-level programming competition.
- Research Paper**: "HybridSkill-JRS: A Job Recommendation System in Real-Time Featuring Hybrid Skill Extraction and a Unified Career Development Framework," presented at **ICCCSS 2025**, Rathinam College of Engineering.
- AgentHack26 – Internal Hackathon (Kalaigarkarananidhi Institute of Technology, 2026)**: Secured **2nd Place** by developing a multi-agent system for automated code vulnerability detection and analysis.
- Solved over 1500** competitive programming problems with consistently high-ranking performance.
